EDUCATION

- **University of Southern California** Los Angeles, USA
Master of Science in Computer Science CGPA: 3.92 / 4 August 2023–May 2025 (expected)
- **Amrita Vishwa Vidyapeetham** Bengaluru, India
Bachelor of Technology in Computer Science & Engineering; CGPA: 9.05 / 10.0 July. 2018–June 2022

TECHNICAL SKILLS

- **Languages:** Java, C, JavaScript, Python, HTML, CSS.
- **Tools & Technologies:** Spring, ReactJS, SwiftUI, Linux, Jenkins, Git, Jira, Junit, EJS, NPM scripts, Node.js, Django, Wireframing UI/UX, Canva, Figma, JQuery, Express.js, REST, SOAP, Docker, SQL, MongoDB, Cryptography, Firebase Firestore, Bootstrap.

PROFESSIONAL EXPERIENCE

- **Veeva Systems** San Francisco Bay Area, USA
Software Engineer Intern May 2024–August 2024
 - Developed key File Staging Repointer feature in Core Docs Team, addressing highest volume of service tickets; this single feature streamlined document management by enabling one-time uploads, significantly reducing user effort and system redundancy.
 - Engineered Automated Glacier Restore process, empowering tech-ops team to efficiently retrieve deleted documents from deep archive storage via simple UI input, eliminating need for manual AWS console operations and dramatically improving document recovery time.
- **AppViewX** Bengaluru, India
Software Engineer August 2022–July 2023
 - Prevented network outages for 100+ customers by upgrading code signing certificate issuance from browser-based to hardware security module, ensuring industry compliance before renewal deadlines.
 - Optimized discovery of certs in the product which boosted the revenue of the company from a specific customer by 15% by enabling keystore module.
 - Implemented key pair rotation for certificate renewals, preserving remaining validity days, significantly reducing customer certificate management costs
 - Optimized DigiCert certificates migration from old to new nomenclature, achieving **O(1) Time Complexity** through efficient query framing and bulk database updates, reducing customer cloud operational costs
- **AppViewX** Bengaluru, India
R & D Software Development Intern February 2022–August 2022
 - Maximized operational efficiency by 50% by implementing RBAC (Role Based Access Control) for OpenTrust CA certificate profiles.
 - Reduced customer effort by 75% by implementing drill down dashboard showing PKI stats (Number of Monitored certificates & keys, Root CAs, Intermediate CAs, Revoked Certificates, Renewed/Reissued Certificates).
 - Enhanced application security by 30% by making sure the code is robust to cross-site scripting attacks.

PROJECTS

- **IntelliProc:** Pioneered a Dual Camera Proctoring System for remote exams, leveraging mobile and webcam integration to ensure academic integrity and prevent malpractice. Tech: NodeJS, React.
- **Hostel Management System:** Led 3-person team in developing a web app to digitize hostel records, optimizing interactions between students and staff. Focused on database normalization and efficient design. Tech: NodeJS, MySQL.

ACHIEVEMENTS & EXTRACURRICULAR ACTIVITIES

- HoneyWell Hackathon 2021 - Winner.
- ACM Data Hack 2019 - Winner.
- Deputy of Technology at AIS (Association of Indian Students) Club at University of Southern California.
- Event & Web Lead of FACE (Forum For Aspiring Computer Science Engineers) Club during undergrad.
